

Μαθαίνω τα σύμβολα
"μεγαλύτερο από",
"μικρότερο από" και
"ίσο με"

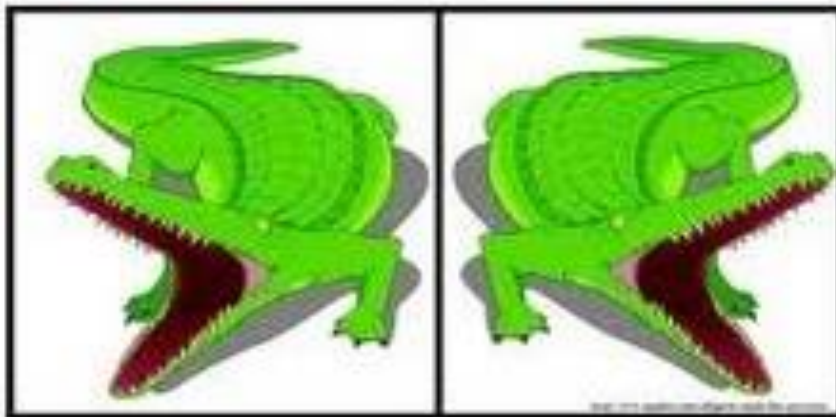

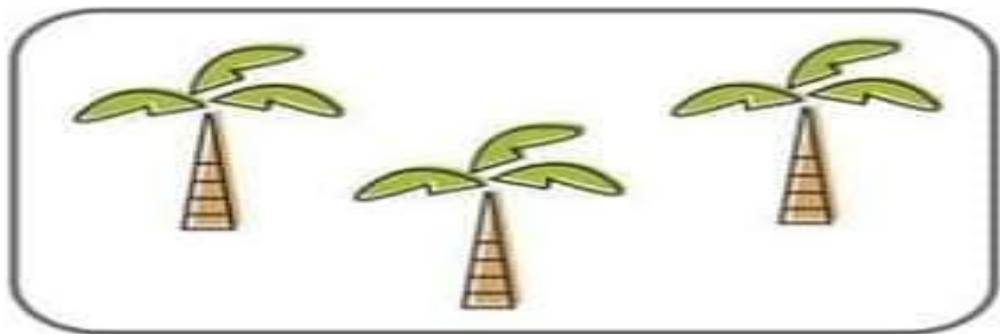

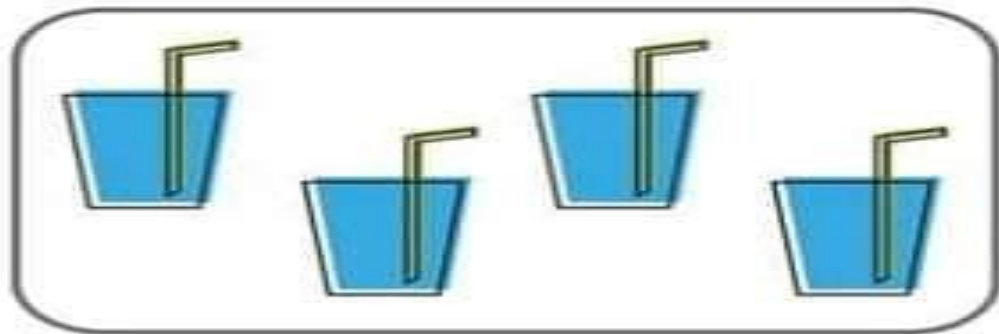

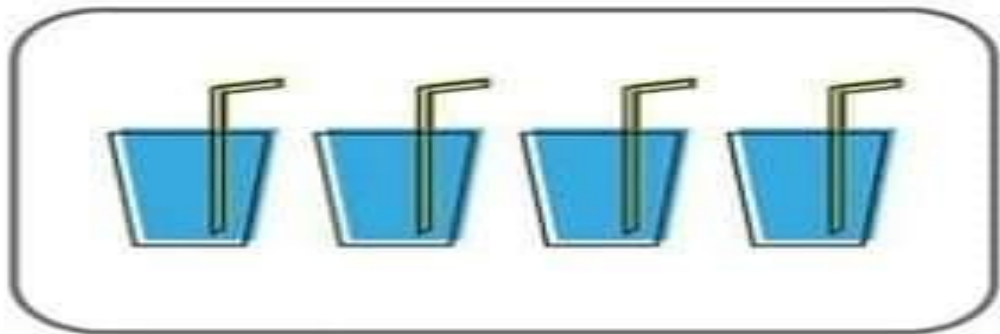

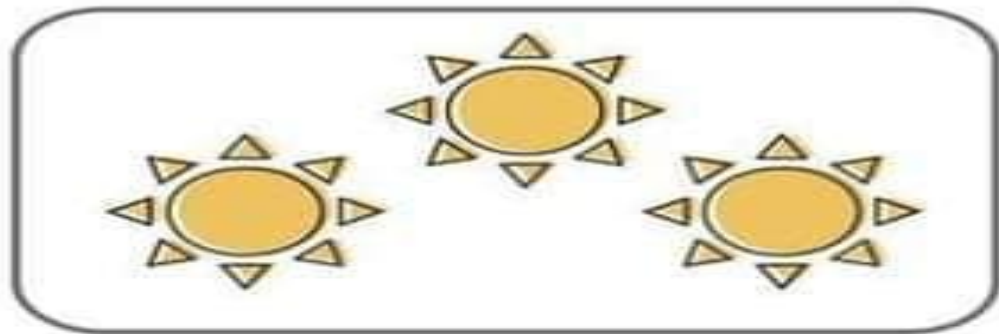

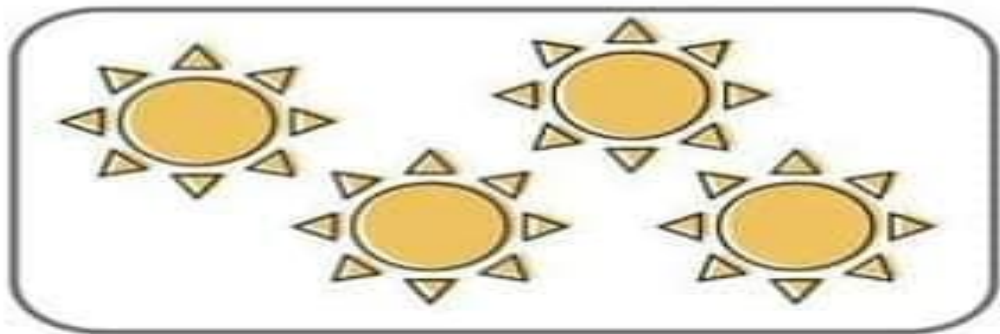

Ένας τρόπος με τον οποίο μπορούμε να διδάξουμε στα μικρά παιδιά την διαφορά των συμβόλων μεγαλύτερου και μικρότερου (><) είναι βάζοντας μικρές κουκκίδες στα σύμβολα. Δύο κουκκίδες αντικατοπτρίζουν πάντοτε τον μεγαλύτερο αριθμό ή μεγαλύτερη ποσότητα πραγμάτων και μια κουκκίδα αντικατοπτρίζει πάντα τον μικρότερο αριθμό ή μικρότερη ποσότητα πραγμάτων, επειδή δύο κουκκίδες είναι περισσότερες από μια κουκκίδα.

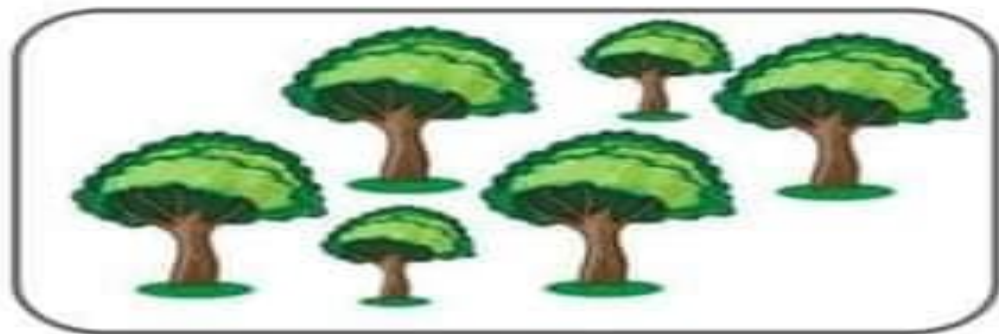

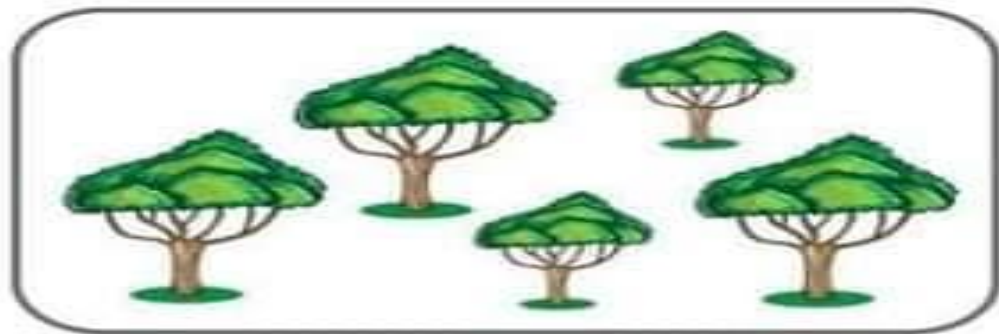

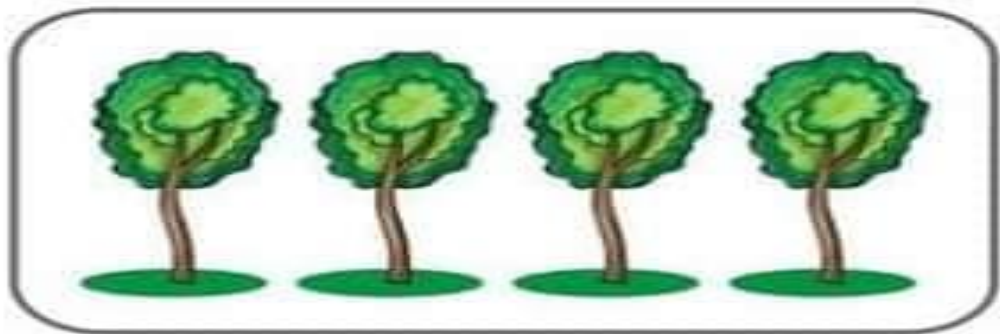

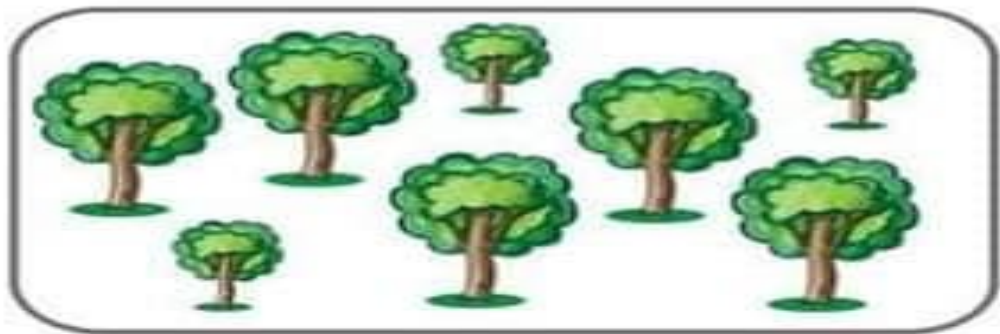

$$18 < 27$$

$$27 > 18$$

Ακόμη ένας τρόπος για να διδάξουμε στα παιδιά την διαφορά των συμβόλων μεγαλύτερο από το μικρότερο είναι με το να παρομοιάζετε τα σύμβολα με το στόμα του αλιγάτορα. Ο αλιγάτορας θέλει πάντα να τρώει το μεγαλύτερο αριθμό. Το στόμα του ανοίγει προς τον μεγαλύτερο αριθμό. Όταν οι αριθμοί είναι οι ίδιοι, δεν μπορεί να αποφασίσει ποιο να φάει και χρησιμοποιούμε το σύμβολο ίσο =
